

**Education 322**  
**Developing an Interdisciplinary Unit**

With Your "Team:"

Create an interdisciplinary unit. **Your unit should include:**

- A cluster diagram developed by the team which visually represents the theme, subject areas included, and topics within each subject area (**note: the unit must include at least 4 subject areas**);
- Unit goals;
- Unit assessment plan;
- Lesson plans. Every team member is responsible to create **at least 3 lesson plans** that tie into the unit. Follow the lesson plan outline previously provided;
- Calendar for the unit;
- Samples of participant evaluations of the unit. Should include a questionnaire that could be given to students to get their feedback about the unit;

Optional materials could include:

- A letter that could be sent home to parents explaining the theme and goals of the unit;
- A sample bulletin board that could be used to advertise the unit;
- Possible field trips/extensions of the unit.

Grading will be determined by:

**Individual portion (100 points) to be determined by:**

- Self evaluation of participation (20 points possible)
- Team evaluation of participation (20 points possible)
- Lesson plans developed for unit - 3 required (20 points possible per)

**Group project (100) to include:**

- Cluster diagram (20 points possible)
- Unit goals (20 points possible)
- Unit assessment plan (25 points)
- Questionnaire to be given to students for feedback on unit (10 pts)
- Interdisciplinary qualities (i.e. connected, creative, logical, engaging) (25 pts)

**Group presentation (50 points possible)**

Graded by colleagues and based on level of professionalism in presentation (i.e. handouts provided, preparedness, questions addressed, easily understood, useable information)
