Installing Westminster Anywhere on Windows 7

Getting Started
When using Westminster Anywhere for the first time, you will need to spend a few minutes installing what is called the VMware Horizon View Client. After you have installed the software, it will only take a click on your desk top to connect you. If you experience problems or have questions during this process please call the Support Phone at 801.832.2023 for assistance.

Installing Westminster Anywhere
To begin open an internet browser and enter the URL https://anywhere.westminstercollege.edu you will notice that it will take a few moments for the web page to load:

We are presented with two options:
- **Install VMware Horizon View Client** – This will option will install the View Client program on your computer, taking hard drive space. Information Services recommends this option if you plan to use Anywhere more than a few times.
- **VMware Horizon View HTML Access** – This will connect you to Anywhere via a web-based View Client. This method bypasses the need to install the program on your computer. If you will rarely need to use Anywhere, Information Services recommends this option.

Select whichever option best suites your needs: if you choose HTML access the guide stops here and you may follow the prompts to log in. If you wish to install Anywhere, click on the install option.
You will be placed on a new page, identify which version of the software you need (to check which version of Windows you have, 32 or 64-bit, right click on Computer and select Properties – under the System section it shows your version of Windows) and click Go to Downloads. **Do not install the Local Mode Option – this will not work with Anywhere.**

<table>
<thead>
<tr>
<th>Product</th>
<th>Release Date</th>

</tr>
</tbody>
</table>

On the next page, scroll down to the Product Downloads section and click Download, then select Run (Internet Explorer is pictured below):

Once the program has downloaded it will begin the installation process. Begin by clicking Next:
On the next screen select I accept the terms in the license agreement, and then click Next:

Let the software decide where on the local C: to load. Then click Next:
You can now set the default server to anywhere.westminstercollege.edu and click Next:

When the “Enhanced Single Sign On” window appears do not make any changes, click Next:
Now you can designate how Westminster Anywhere is accessed. If there is a checkmark next to the option, these will be the shortcuts that will be created. When complete, click Next:

![Configure Shortcuts](image1.png)

Almost done installing, click Install:

![Ready to Install](image2.png)
Click Finish:

![VMware Horizon View Client Setup](image1)

After it finishes installing you will have to restart your computer, so save anything you are working on and click Yes:

![VMware Horizon View Client Setup](image2)

Now that you have restarted your computer, click the VMware View Client icon on your desktop. This will initiate the connection to Westminster Anywhere.
When the VMware window opens the connection server should be displayed as anywhere.westminstercollege.edu under the cloud. If it’s not, go ahead and click on “+ Add Server” and add the address. Double-click the cloud to continue:

The Login screen will now open. Enter your username and password then click Login:

Select your appropriate desktop (Academic or Administrative) and then click double-click:
Now you are connected to Westminster Anywhere.
